

I believe location based service is more useful than e-mail or web-browsers. I love services that our navigation, my daughter's tracking system, we call "Hijack".

Why LBS service is not so popular in the world.

The reason is simple. It's seamless.

Are you ~~sleeping~~ sleeping outdoor. eating outdoor. working outdoor. living outdoor? Of course NOT.

Indoor LBS is important. and the resolution is IMES.

We could use GPS, both ~~indoor~~ outdoor and indoor.

The mouse shows IMES solve your LOST indoor
